COMD Office

Steuben Hall, 4th floor

Pratt Institute

200 Willoughby Avenue

Brooklyn, NY 11205

Accessing the server:

Server name:

mysite.pratt.edu

Username:

ie: rgenalo

Password:

ie: Co0lestpassw0rdEvaR

Once connected, you will need to create a new folder in the root area called "public_html".

Drag and drop your entire working folder (with HTML, CSS, and image files) from your desktop to the "public_html" folder.

The URL will be:

http://mysite.pratt.edu/~onekeyname/assignmentfoldersname

ASSIGNMENT 1 INTERNET OF THINGS UX

Though you've likely had access to the Internet for your entire life, the technology is still very much in a nascent stage. The world around us -- our communities, governments, homes, pets, nature -- are poised to come "online" in the near future, setting the stage for a degree of decision-making that humans have yet to experience.

For our first project together, please choose 1 (one) currently disconnected thing that you would appreciate connecting to the Internet and, therefore, your smartphone. Spend 30 minutes imagining what it would be like to communicate with that thing via your smartphone or computer. What information would you want from it? What might it want from you?

Using what you've learned in today's class about user experience (UX) and well as the Moleskins you've been offered, illustrate (pencil, pen, paint, crayon) three (3) key moments that this newly connected thing will make possible.

DELIVERABLES

Due Sept 2nd: Mobile user experience sketches due.

Due Sept 9th: Refined UI drawings / watercolors uploaded to your FTP server in form of scans or photographs.
